

She Can Foundation

Website Development Report

Prepared by: Aprajita Ranjan (Riya)
Reg. No.: 23BA111399 — VIT Bhopal University

She Can Foundation — Tech Internship Selection Task
Role Applied: Web Development Internship

May 2026

1. Project Overview

This project is a full, multi-page website built for **She Can Foundation** — a government-registered NGO (Indian Society Act, 1860) working towards empowering women through education, digital skills, and community-driven programs across India and beyond.

The website was developed as part of the **She Can Foundation Tech Internship Selection Task** under the Web Development role. Rather than delivering a minimal single-page site, this project goes significantly beyond the requirements — delivering a production-grade, emotionally rich, fully responsive **4-page website** with animations, interactive components, form validation, and real organisational data.

Deliverables

File	Purpose
index.html	Main landing page — Sanskrit intro, hero, programs, stories, awareness slider
donate.html	Donation flows — money (UPI/QR), clothes, sanitary pads with before/after animations
volunteer.html	Internship roles, perks, full validated application form
contact.html	SOS distress section with helplines, general contact form, FAQ accordion
styles.css	Shared global stylesheet across all 4 pages
shared.js	Shared JavaScript — scroll reveal, counters, nav, back-to-top

2. Motive & Design Philosophy

2.1 Emotional Connection First

She Can Foundation's mission is deeply human — it exists because women are denied opportunities, education, and dignity. The website was designed to *feel* that weight, not just describe it. Every decision — from the Sanskrit curtain to the awareness stats slider — was made to create **emotional resonance** before asking for any action.

2.2 Sanskrit Intro Curtain — Why?

The opening sequence uses two Sanskrit shlokas:

"महिलां श्रद्धां कुरुते देवताः प्रसन्ना भवन्ति ।"

"Where women are honoured, there the gods are pleased to dwell."

"महिला शक्तिः सत्यं, नरकं न भवति ।"

"The world belongs to women — they are the greatest treasure of creation."

These were chosen deliberately:

- India has a deep cultural relationship with Sanskrit and these values
- The shlokas establish moral authority — our own ancient wisdom says women must be revered
- The dramatic curtain creates a moment of pause, forcing the visitor to feel before the site loads
- The Durga avatar reinforces strength and power, not just vulnerability

2.3 Colour Palette

Colour	Hex	Meaning
Rose	#c2185b	Femininity, warmth, urgency, care
Gold	#f9a825	Value, hope, divinity, celebration
Saffron	#e65100	Indian identity, activism, courage
Cream	#fff8f0	Softness, safety, approachability
Charcoal	#1a1a2e	Authority, contrast, dark impact sections

The palette was chosen to feel **Indian, warm, and feminine** — not clinical or corporate. It avoids the cold blues of typical NGO websites.

2.4 Typography

- **Playfair Display** — editorial serif for headings. Conveys dignity, tradition, and emotional weight.
- **Tiro Devanagari Hindi** — used exclusively for Sanskrit shlokas. Renders Devanagari script authentically.
- **DM Sans** — clean geometric sans-serif for body. Highly legible, modern, pairs elegantly with Playfair.

3. Site Architecture

All pages are plain HTML/CSS/JS files linked via relative paths. No build tools, no npm install — the site works by simply opening index.html in a browser and is ready to deploy on GitHub Pages, Netlify, or Vercel with zero configuration.

```
shecan_site/  
  ■■■ index.html      ← Home (entry point)  
  ■■■ donate.html     ← Donation flows  
  ■■■ volunteer.html  ← Roles + Application  
  ■■■ contact.html    ← SOS + Contact + FAQ  
  ■■■ styles.css      ← Shared global styles  
  ■■■ shared.js       ← Shared JavaScript  
  ■■■ logo.png        ← Organisation logo  
  ■■■ assets/         ← Local images (optional)
```

4. Page-by-Page Breakdown

4.1 index.html — Home Page

Sanskrit Intro Curtain

The page opens with a full-screen overlay (z-index: 9999) split into two curtain panels. Screen 1 shows a Namaste illustration with the first shloka (0–2.8s). Screen 2 shows a Durga avatar with the second shloka (2.8–5.2s). At 5.2s the curtains translate $\pm 100\%$ with a cubic-bezier(0.76, 0, 0.24, 1) ease. A Skip button clears all timers and immediately triggers the open animation.

Hero Section

Animated background blobs (CSS blob keyframe on circle elements), counter stats animating from 0 via IntersectionObserver, hero image card with a floating pill, two CTAs, and a Govt. Registered badge.

Awareness Stats Slider

The most emotionally impactful section — an auto-playing card slider with 6 real statistics:

- 23 million girls drop out annually due to menstruation (India)
- 40% of girls miss school due to lack of proper clothing
- 1.5 crore child marriages per year in India
- 160 million illiterate women in India
- 1 in 3 women globally face physical or sexual violence
- 48% of women in developing countries have never used the internet

Auto-advances every 4 seconds with dot navigation, prev/next buttons, and responsive slide counts.

4.2 donate.html — Donation Page

Three-Tab System

Money tab: 6 preset amounts with real-world impact labels, custom input, CSS-generated dummy QR code (10×10 grid), dummy UPI/bank details with copy-to-clipboard.

Clothes tab: Before/after image reveal using clip-path animation. "Before" label fades out on reveal so only one label shows at a time. Character story animation (emoji journey) triggered by IntersectionObserver.

Pads tab: Same mechanism. Layout reversed with direction: rtl. Journey: No pad → Donate → Safe → In school.

4.3 volunteer.html — Volunteer & Intern Page

6 clickable role cards that pre-fill the application form's role dropdown and scroll to it. Full 10-field validated application form matching the original She Can Foundation Google Form. Perks section on dark background with offer letter, certificate, LOR, real project experience, national network, and core team opportunity.

4.4 contact.html — Contact & Help Page

SOS / Distress Section — Most Important

Placed prominently at the top of the contact page. Uses a warm rose gradient (not clinical white or alarming red) to feel safe and approachable. Provides 5 real helpline numbers:

Helpline	Number	Availability
She Can Foundation	+91-8283841830	Mon–Sat 9am–6pm
Women Helpline (National, Govt.)	181	24/7, Free, All India
iCall Mental Health (TISS)	9152987821	Mon–Sat 8am–10pm
Vanita Samman (Domestic Violence)	7827170170	Delhi Police, 24/7
Emergency / Police	112	All India, 24/7

Anonymous distress form — name and contact are optional. Success state shows emergency numbers again so the user can call immediately.

FAQ Accordion

6 FAQs with CSS accordion using max-height transition (0 → 300px). The + icon rotates 45° to × on open. Covers: unpaid internship, non-student volunteers, donation tracking, minimum donation, distress confidentiality, campus ambassador process.

5. Shared Infrastructure

5.1 styles.css

- CSS Custom Properties (variables) for all brand colours, fonts, radii, shadows, transitions
- Reset — box-sizing, margin/padding zero, image display block
- Fixed navbar with backdrop-filter: blur(20px), scrolled shadow state
- Shared buttons (primary, outline, gold), section helpers, scroll reveal classes
- Footer 4-column grid with responsive collapse
- Keyframes: fadeUp, fadeIn, scaleIn, pulse, blob, marquee, logoGlow
- Breakpoints at 900px (tablet) and 600px (mobile)

5.2 shared.js

- Nav scroll handler — adds .scrolled class (box-shadow) after 50px
- Back-to-top — shows/hides #btt after 400px, smooth-scrolls on click
- Mobile menu toggle — toggleMenu() adds/removes .open class
- Scroll reveal — IntersectionObserver on .reveal elements, fires once at 12% visibility
- Counter animation — counts 0 to data-target over 2s at 60fps using setInterval
- Active nav link — matches current filename to nav links, adds .active class

6. Technologies Used

Technology	Usage
HTML5	Page structure, semantic markup
CSS3	Styling, animations, layouts (Grid + Flexbox)
JavaScript (ES6+)	DOM manipulation, interactions, form validation
CSS Custom Properties	Design system / theming variables
CSS Grid	Multi-column layouts throughout all pages
CSS Flexbox	Navigation, cards, inline layouts
CSS clip-path	Before/after image reveal animation
CSS backdrop-filter	Nav frosted glass blur effect
IntersectionObserver API	Scroll reveal, counter animation, story animation
Google Fonts (CDN)	Playfair Display, Tiro Devanagari Hindi, DM Sans
Unsplash (CDN)	Placeholder images (to be replaced with real photos)
GitHub Pages (recommended)	Static site hosting, zero configuration

No frameworks. No build tools. No dependencies. The entire site runs as plain HTML/CSS/JS with zero npm install required.

7. UI/UX Design Decisions

7.1 Micro-interactions

Every interactive element has a purposeful micro-interaction:

- Buttons lift on hover — transform: translateY(-2px) with enhanced box-shadow
- About feature cards slide right — transform: translateX(5px)
- Nav links animate an underline from scaleX(0) to scaleX(1)
- Role cards show a '✓ Selected' badge via ::after pseudo-element
- Logo pulses with a layered rose + gold box-shadow animation

7.2 Dark Sections

Two dark sections (Impact + How to Donate) are used intentionally: they create visual rhythm, make numbers feel more impactful, and create a 'moment of gravity' before a CTA.

7.3 Animation Easing

All animations use cubic-bezier(0.4, 0, 0.2, 1) — the Material Design easing — for smooth, natural motion. The intro curtain uses cubic-bezier(0.76, 0, 0.24, 1) for a more theatrical open.

7.4 Forms

- Labels above inputs (not placeholders as labels) for accessibility
- Focus states with rose box-shadow ring: 0 0 0 3px rgba(194,24,91,0.12)
- Inline per-field error messages with `.form-error.show` class
- Success states animate in with `scaleIn` for positive reinforcement

8. Accessibility & Responsiveness

Accessibility Measures

- All images have descriptive alt attributes
- Buttons have aria-label attributes (hamburger, back-to-top)
- Skip button on intro for keyboard/return visitors
- `lang=en` on all pages
- White text on rose (`#c2185b`) passes WCAG AA contrast ratio
- Helpline cards use tel: links — directly tappable on mobile
- All link text is descriptive — no 'click here'

Responsive Breakpoints

Breakpoint	Layout Changes
> 900px	Full desktop — nav links, multi-column grids, hero image side-by-side
<= 900px	Nav links hidden, hamburger shown; 2-col grids collapse to 1 col
<= 600px	Section padding reduced; footer collapses to 1 col; font sizes scale via <code>clamp()</code>

All heading font sizes use `clamp(min, preferred, max)` for fluid typography that scales smoothly across all viewport widths without media query jumps.

9. Key Features Summary

Feature	Page(s)	Description
Sanskrit curtain intro	index	Two-screen animated intro with Devanagari shlokas
Animated blobs	index	Organic floating CSS shapes in hero background
Counter animation	index, donate	Numbers count 0 → target on scroll
Scrolling marquee	index	Infinite banner with real NGO slogans
Before/After reveal	donate	clip-path animation showing girl's story
Character journey	donate	Emoji step animation via <code>IntersectionObserver</code>

Feature	Page(s)	Description
Awareness slider	index	Auto-playing stats slider with 6 real facts
Dummy QR code	donate	CSS-grid generated QR-like payment mockup
Copy to clipboard	donate	One-click copy for UPI/bank details
SOS distress form	contact	Anonymous form + 5 real national helplines
FAQ accordion	contact	Smooth max-height CSS accordion
Role-card → form link	volunteer	Click role card pre-fills + scrolls to form
Founder watermark	index	Clear dummy image disclosure on founder photo
Logo glow animation	all	Pulsing rose+gold box-shadow on nav logo
Scroll reveal	all	Staggered entrance animations on scroll
Responsive hamburger	all	Full-screen mobile overlay menu
Back to top	all	Fixed button, appears after 400px scroll

10. Dummy / Placeholder Disclosures

The following elements use placeholder data and **must be updated by the organisation** before going live:

Element	Current Value	Action Required
Founder image	Unsplash stock photo	Replace with actual photo of Reeta Mishra
UPI ID	shecan@ybl	Replace with registered UPI ID
Bank account	XXXX XXXX 1234	Replace with real account number
IFSC code	SBIN0001234	Replace with real IFSC
QR code	CSS grid pattern	Replace with actual UPI QR code image
Story images	Unsplash / local assets	Replace with organisation-approved photos
Impact stats	Estimated figures	Verify with official NGO data
80G status	Listed as eligible	Confirm actual 80G registration status

11. Future Scope

- **Backend integration** — Firebase Firestore for volunteer forms and contact submissions
- **Email notifications** — EmailJS or Formspree, zero backend setup required

- **Payment gateway** — Razorpay or PayU for real donations with receipts and 80G certificates
- **CMS integration** — Contentful or Sanity so non-technical staff can update content
- **Admin dashboard** — Protected panel for volunteer applications and distress messages
- **Multi-language** — Hindi version for broader rural reach
- **PWA** — Service worker + manifest for offline capability and app installation
- **Analytics** — Plausible.io or Google Analytics to track programme interest and donor drop-off

This report was prepared as part of the She Can Foundation Tech Internship application by **Aprajita Ranjan (Riya)**, B.Tech CSE (AI & ML), VIT Bhopal University — Reg. No. 23BAI11399.

The website was built entirely from scratch using vanilla HTML, CSS, and JavaScript — no templates, no frameworks. Every design decision was made with the organisation's mission and the women it serves at the centre.
